2 days ticket: DKK 995 + VAT

Registration opens in May on www.whinn.dk

Venue

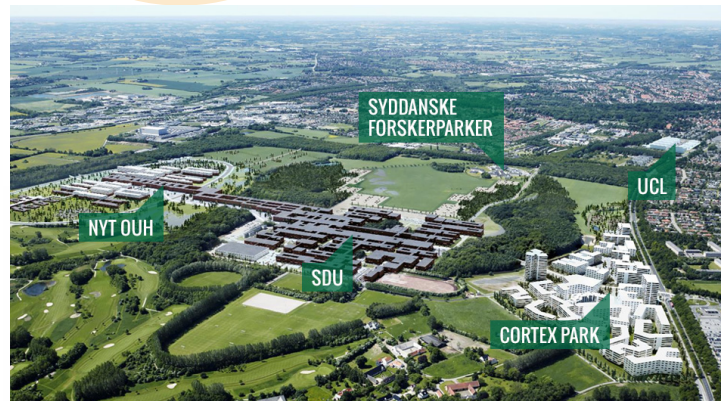

Campus Odense is a new urban zone in the city of Odense in the heart of Denmark. Campus Odense is recognized as one of Europe's most ambitious growth and development areas housing important research and educational institutions as well as businesses and start-up hubs focusing on robotics and health technology. To support this, Campus Odense also includes residential and commercial entities. When the brand new Odense University Hospital opens in 2022, Campus Odense is expected to have 60,000 daily users, who will either live, work, study or in another way use the area.

When done, Campus Odense will be the first place in Europe where an international university and a major world class hospital are constructed as one coherent building, which is expected to create optimal conditions for healthcare and welfare tech innovation based on the practical realities of a modern hospital.

What can I expect?

WHINN offers a wide range of different opportunities for anyone interested in health technology and innovation from health and care organisations in both the private and public sector.
